In-depth climate risk and resilience capacity
assessment of the Tamale city region food system

Report by Philip Amoah (PhD)
December 2020

RUAF

Action planning continued

- Intervention strategies to be discussed and developed into a “City strategic agenda” to mitigate shocks and stresses due to climate change

- Strategies

- political buy-in (what policies can be designed?) policy briefs
- Advocacy

Linking up with other related platforms/programs

- FAO initiative to facilitate a working group regarding the role of cities in the Urban Food Systems Summit. This week there is a meeting with the Action Track leaders on this.
- FAO /ICLEI/CityFood supporting cities and local governments in getting engaged in the Food Systems Summit Process, through dialogues, in several African Cities.
- Capacity development at institutional level
